

You have one of the toughest and hardest working side by side's available...now get one of the toughest and loudest stereo tops designed specifically for it! Let us introduce you to our AudioFormz roof top stereo systems! Manufactured from solid hand-lay molded fiberglass, it is one of the lightest yet strongest stereo tops on the market today! Our stereo top has some very unique features that no other stereo top on the market has, including ultra efficient LED lighting packages that flush mount into our stereo top...no exterior lights to get knocked off!

- Manufactured in the USA from 100% solid fiberglass with our exclusive black, textured, durable finish that can withstand the harshest environments!
- Comes standard with LED dome strip lighting, and separate switches installed for radio, dome, front and rear lighting.
- Installs quick and easy with supplied hardware and clamps.
